

THERMAL JACKET FOR PORTABLE EYEWASH

THERMAL PROTECTION JACKET TO SUIT THE 34L PORTABLE EYEWASH

FUNCTION AND FEATURES

■ Rugged materials

PVC coated nylon exterior with aluminium foil XPE foam insulated interior.

■ Easy care

Waterproof, mildew resistant and easy to clean material.

■ Quick access

Fast activation by pulling the nylon pull strap, secured by velcro strips.

■ Protect from extreme heat

Reduce the risk of overheating and non compliant water temperatures.

APPLICATION

MODEL: 2501 TC

Model 2501 TC is a thermal protection jacket for 34 Litre portable eyewash with Right Hand side filling cap.

Recommended for areas where extreme heat or sunlight might cause water to overheat.

This cover significantly reduces the heating effect from the sun on the water stored within the eye wash station.

STRUCTURE

The jacket is made of Green PVC coated Nylon fabric exterior with Aluminum foil XPE Foam thermal insulation interior.

The thermal jacket is waterproof, mildew resistant, easily cleaned, quick drying, abrasion resistant and has excellent strength. Activation is easy with the nylon pull down strap that is secured in place by Velcro strips.
