- 45mm long thermowell pocket included
  - Accuracy of +/-2%
- 
- Weatherproof design (back entry model only)
  - 3" (75mm) face
-

## PRODUCT DETAILS

These quality stainless steel temperature gauges are available in either a bottom entry or back entry design and suitable for a wide range of applications including hot water, HVAC, process, and other general industry uses.

Featuring 304SS housing and a 316SS thermowell pocket, these temperature gauges provide a long service life in demanding environments.

**Note: Only the back entry model is weatherproof. The bottom entry model should be installed in a covered area.**
